

## UNMATCHED PERFORMANCE

The Multifeeder Technology **FRICION FEEDER** with semi automatic **CATCH TRAY** provides a controlled feeding environment for batch counting and stacking applications. When the operator removes the previously counted stack of products, a photo eye provides a signal to the feeder to cycle the next batch to be automatically counted and stacked. This system is perfect for the semi automatic packaging of greeting cards, envelopes, telephone cards, fine writing paper and similar products.

The Multifeeder Technology **FRICION FEEDER** with **AUTOMATIC DROP TABLE** provides a dramatic increase in batch counting efficiency. The **ADT** is an automatic catching and dropping device for high performance operations. The **ADT** interfaces with the **FRICION FEEDER** computer for superior performance, and requires no air. It is perfect for counting copy paper, high quality paper, envelopes, business forms, greeting cards and similar hand collated products.
